The graphics are sized to fit a wood slat that is 1.5" wide. The length depends on which graphic you choose. Paint the wood then Mod Podge or glue the graphic in the center. Spray over the text with a fixing agent, such as clear gloss, to prevent the ink from smearing. Mod Podge the sign. Add in two eyelet hooks on the top or magnets on the back. Hang from a window or stick to a metal door.

Mode Podge the graphic of choice onto a wood slat. We used 1.5 x.25 slats that were 12" wide. Trim the width as needed for the graphic chosen. Attach two tiny eyelet screws into the top. Hang inside the front window using suction.
