

DIY Hand Sanitizer

Gel Hand Sanitizer A non-sticky gel (using the aloe brand we used) which can be squeezed out of a bottle. Does not use water.

Ingredients: 100% Aloe Vera Gel Tea Tree Oil

Instructions: Fill almost full with 100% Aloe gel. Add tea tree oil. For 4 to 6 oz. size use 1 to 2 drops of higher quality oil or 6 to 8 of lower quality oil. (You do not have to be exact.) Mix well. Adjust as needed for size.

Use: Squeeze a dime sized amount of gel into your hands and rub in. Use whenever needed.

Liquid Hand Sanitizer Perfect for a spray bottle. It does not use aloe gel.

Ingredients: Distilled Water Tea Tree Oil

Instructions: Fill your spray bottle with distilled water. For 4 to 6 oz size use 1 to 2 drops of a higher quality oil or 6 to 8 a of lower quality oil. (You do not have to be exact.) Mix well. Adjust as needed for size.

Use: Spray on hands whenever desired.

Lotion Hand Sanitizer A lotion type consistency to your liking depending on how much aloe gel you add.

Ingredients: Distilled Water, 100 % Aloe Vera Gel, Tea Tree Oil

Instructions: Fill your bottle at least ½ full of distilled water. Add in Aloe vera gel until it's the consistency you like. Add more water if desired. For 4 to 6 oz size use 1 to 2 drops of higher quality oil or 6 to 8 of lower quality oil. (You do not have to be exact.) Mix well. Adjust as needed for size.

Use: Pour/squeeze out of a soft plastic bottle. Use about a dime size and rub into hands. Use when needed.

Cut out label size of choice. Cover with packing tape, leaving enough tape on the edges to stick to the bottle.
