

# Sugar Bowl Flower

Print onto thin paper or a vinyl sheet. Vinyl works best. The black can be used to trace onto your own vinyl or material. The colored pattern can be printed onto thin paper though it will be more difficult to glue it smooth onto the rounded surface.

Cut out either one carefully with utility knife. Glue or stick onto the front of the glass bowl. If you attempt to use paper you may also need to trim the rose edges so they are thinner and won't bubble on the curved surface. We used the 2" size rose cut on vinyl, but there is a smaller size option also.
