

# Fruit Fly Catcher

Cut a plastic soda bottle as shown. Place a piece of ripe fruit into the bottom section. You can remove the lid of the bottle or you can drill a small hole into the lid. Turn the top upside down and place it into the bottom. Let it sit overnight in your kitchen making sure no other things are around that would draw the flies. The next morning take your container outside away from the house and let the flies free. Repeat as needed.

Print and cut out the label you desire to place on your bottle!

**Catch & Release**  
FOR FRUIT FLIES

Place a piece of ripe fruit in the bottom of the container. Let sit over night in the kitchen. The next morning release flies outside into the wild!
