

Mini Book Patterns

These patterns are made to fit mini books using a large craft stick (tongue depressor). The size of the book is 1" tall by 5/8" wide. You can make thicker books by placing more inner pages inside however that might make the current covers provided not fit. It's very easy to make your own covers however.

◆◆◆◆◆◆◆◆ These images are for illustration only. ◆◆◆◆◆◆◆◆

This shows the size of the front and back piece cut from a large craft stick. Measure the stick and then cut.

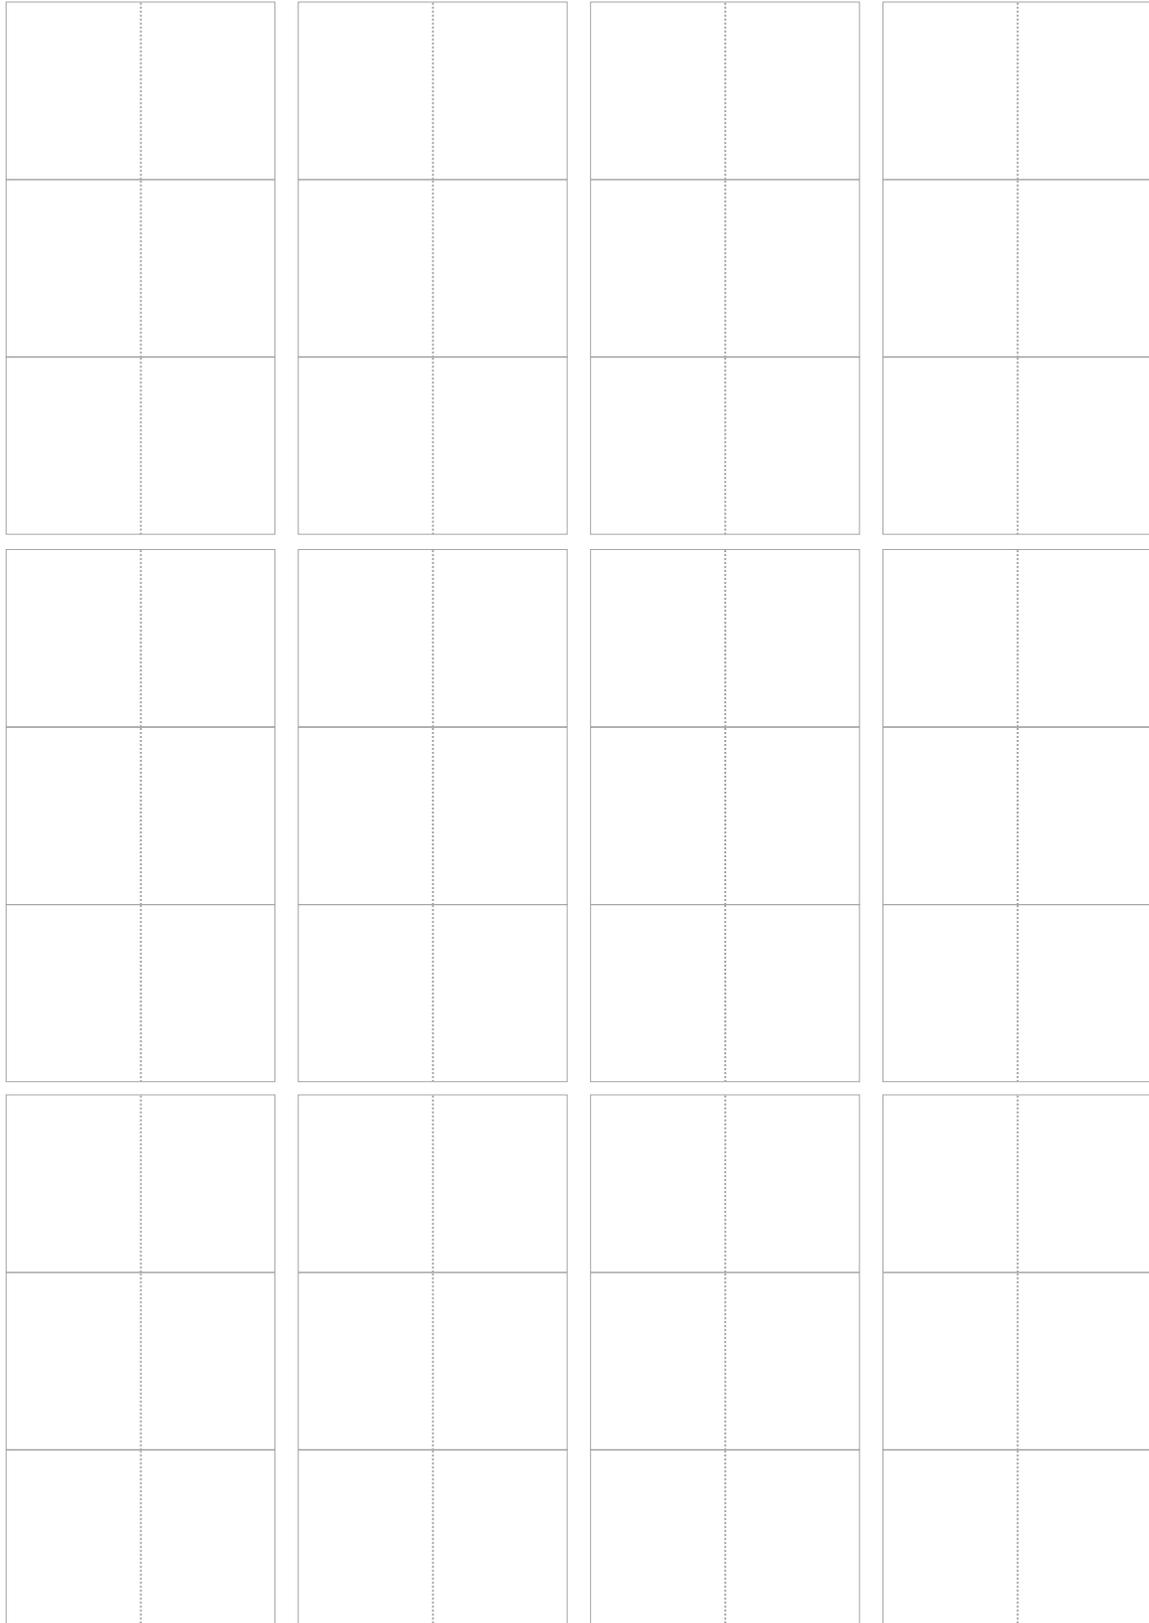

This shows how to cut the inside pages of the book and where to fold. Use the separate page for actual printing.

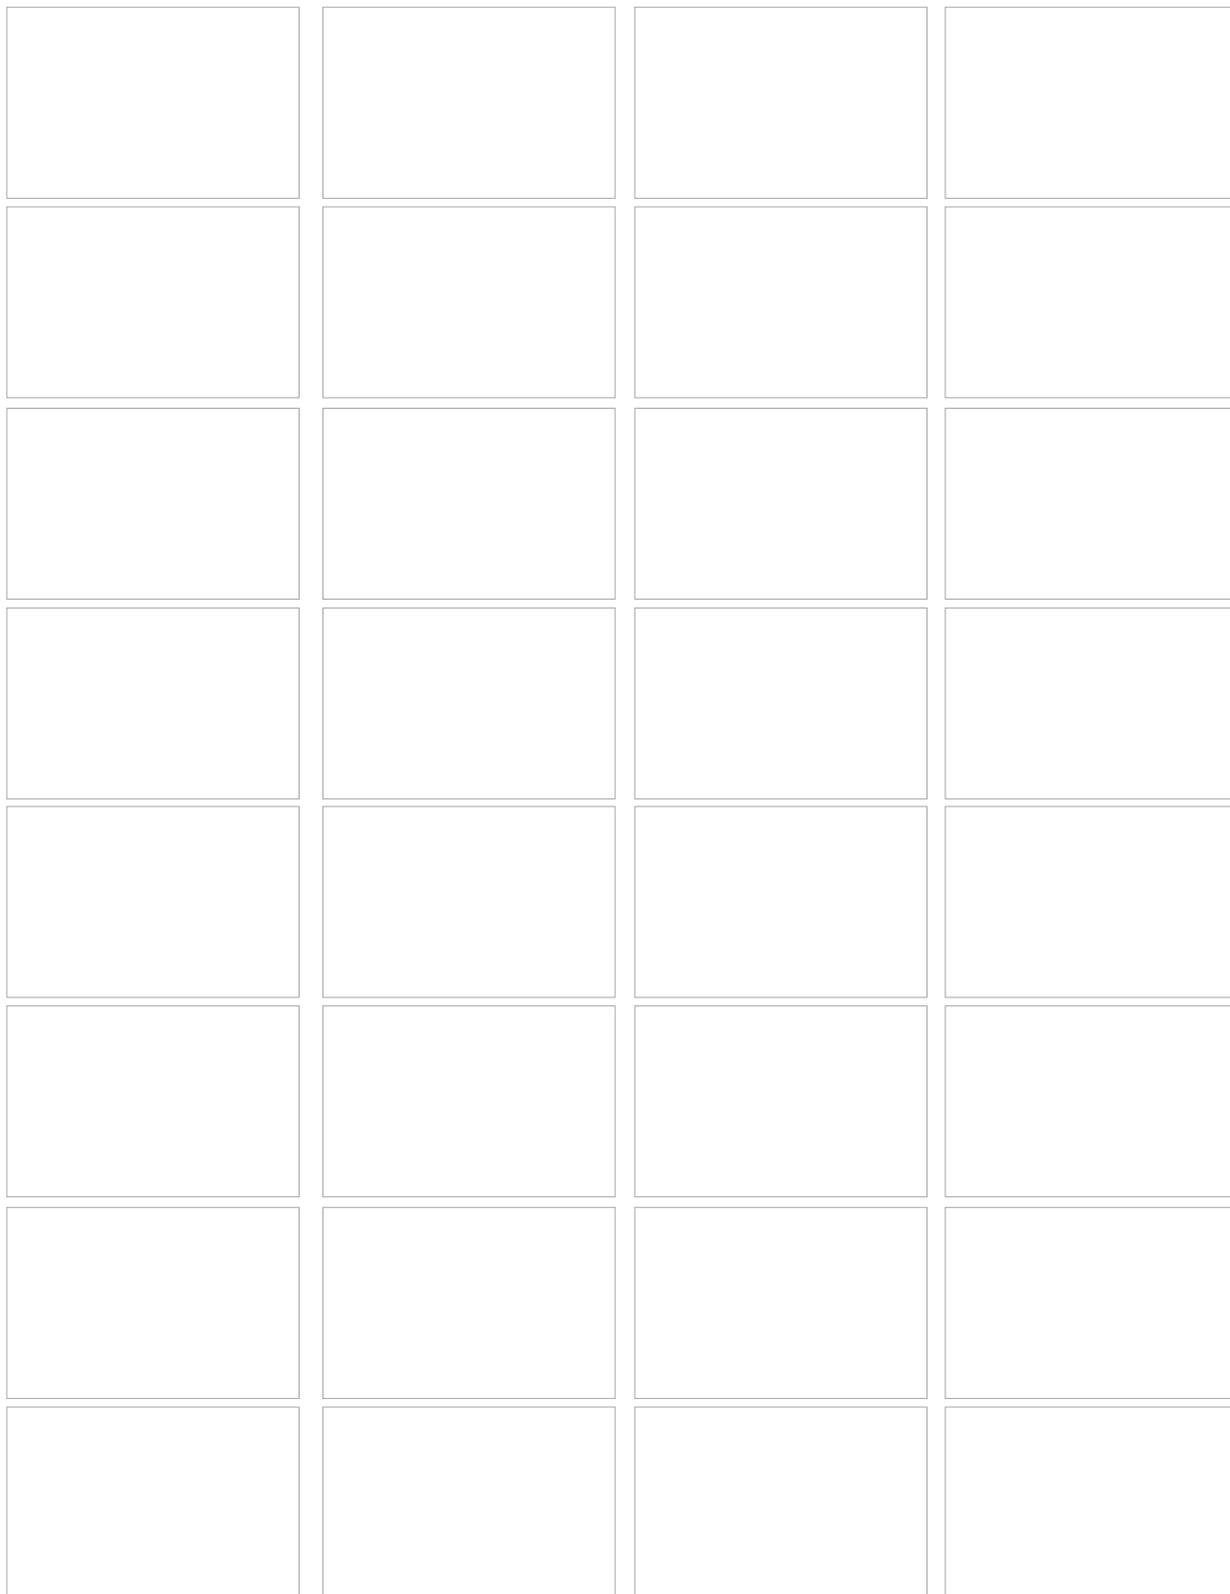

Inner Book Pages

These are for the inner pages of the book. Print them on white or cream colored paper. We suggest using 2 or 3 sets of pages for each book. Using more will make the book thicker and the provided covers may not fit. You can, however, make your own size cover if you choose to add more pages.

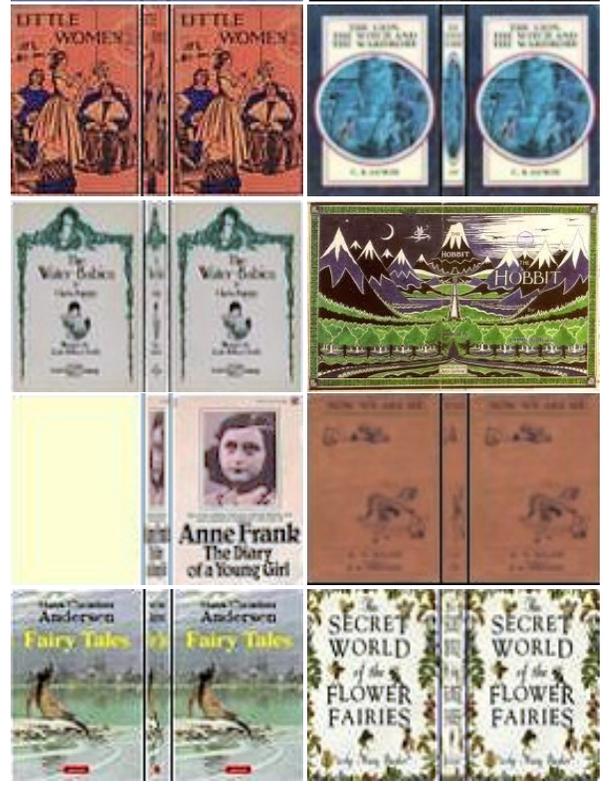

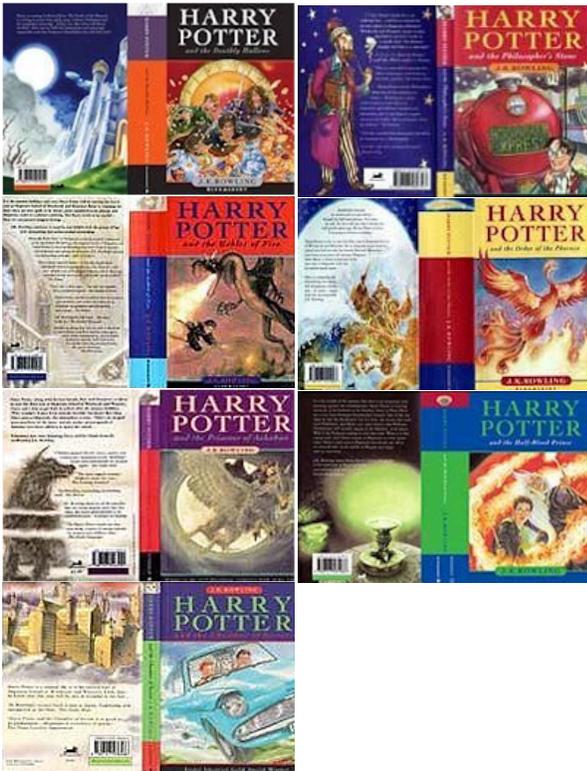

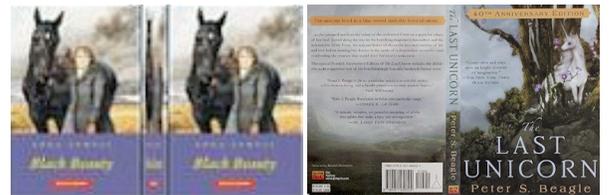

Book Covers

You can print your own on any color paper you wish using this template. Or use it to staple over your paper of choice and cut out the covers needed. Each square covers the front and back of the book.
