TV Top Shelf from Paint Sticks

This was our original sketch up graphics.

cut paint sticks all to same length
line them up until they are equal to the length
of a tongue depressor
(I'm guessing this will be 5 or 6 of them)

cut dowel to paint stick length
pre-drill each end for screws

OPTIONAL:
Line inside front edge with felt to protect monitor

screw tongue depressors to
each side of dowel
don’t fully tighten

level top and tighten screws

paint if desired

cut to same length
 glue together with wood glue

Stack 2 tongue depressors
drive through ONE end using 1/8” or 1/4” drill bit
(depending on screw size - you want it to be a little loose on screw)
