

Mini Clip Board Christmas Countdown

SUPPLIES

Wood clip board 6 x 9" (must be THIS size)

Printer Scissors Ribbon for decoration. (optional)

Mod Podge (optional)

Printer Paper (*Cardstock is nice for the numbers but you can use regular paper also.*)

Glue (Choices: Stick. Elmer's or spray glue, glue gun.)

Large envelope or CD envelope as pouch if desired, for back. This holds the letters you take off or while in storage. Not a necessity however. A CD envelope works well. You can adapt a regular large envelope that is big enough to hold the letters or make a pouch out of paper.

INSTRUCTIONS

1. Print ONE the decorated background of your choice that will be glued to the front of the clipboard.
2. Cut it out carefully.
3. Use glue of your choice to adhere the background to the front of the clipboard.
4. *If desired* Mod Podge over the front of the entire board and background, being careful around the metal clip. This gives it a nice finish and will make it last longer though not absolutely necessary.
5. Print the number cards on cardstock if you have it (they will last longer) or regular paper works also. Cut them out.

Make a pouch, if desired, for the back of the clipboard to hold the letters when not in use. A CD envelope works perfectly. I added felt (a 1" ribbon would work well) to the back to hold the flap closed. This is optional though.

Tie a nice bow with a ribbon of your choice and glue or hot glue onto clip part of board.

This is a count DOWN so stack the numbers in REVERSE with Christmas Day! being at the very bottom and the number 25 on top. Remove one a day starting the 1st of December. This can be hung or placed on a small easel.
